## How does Galvanic work?

Galvanic is an electrical therapy utilising a smooth-flowing Direct Current. This current is extremely safe, painless and delivers dynamic results for every skin concern.

Galvanic skin treatment exfoliates and detoxifies the skin so that it feels healthy, bright, and relaxed. The electric current used in it stimulates the skin by enabling lymph drainage, which allows the skin to cleanse itself and draws out harmful toxins from deep within it.

Galvanic current boosts the circulation of blood to the surface of the skin and sloughs off dead cells promoting cell regeneration. This process helps in tightening and revitalising the skin.

Galvanic treatment keeps premature ageing at bay by boosting hydration and collagen production in the skin, thus restoring its balance and making it smoother. Works as a highly effective, non-invasive, anti-ageing treatment.

Products applied directly to the skin penetrate deep into the layers of the skin so that they are immediately absorbed.

Galvanic facial turns a rough and dull skin into a smooth and glowing one through deep cleansing, gentle exfoliation, and complete detoxification. It also makes the complexion significantly clearer and brighter.

As the negative ions in the Galvanic current draw all dirt, grime, and impurities out of the skin pores, they get unclogged and clear. This not only helps in reducing the appearance of acne but also prevents its further occurrences.

## Your Results

Cleanses and Detoxifies the Skin

---

Promotes Blood and Oxygen Flow

---

Provides Moisture and Nourishment

---

Improves Skin's Elasticity

---

Increases Product Penetration

---

Gives Smooth and Radiant Skin

---

Helps Control Acne

---

## FAQs

### Is it new?

Galvanic beauty treatments have been standard salon practices for many years. The earliest, electrolysis, made the switch from a medical procedure to a beauty treatment in the 1880s. Carlton's Galvanic machines use advanced technology to penetrate skin specific complexes deep into the skin, providing long lasting results and radically improves key skin concerns.

### Is it painful?

Galvanic treatment shouldn't ever be painful. The client will feel a warming sensation on the skin, and under the surface of the skin. This should always feel soothing, and comfortable. You should always discuss your concerns with your therapist before your treatment.

### Is it suitable for me?

Galvanic treatment carries a few restrictions, but it is suitable for most people, male and female. Your therapist will go through a detailed consultation with you to ascertain your suitability for the treatment.

### What results should I expect to see?

Some clients see results immediately; some will need to wait 3 or 4 treatments to see noticeable results.

### How many treatments will I need?

Individual cases differ, but as a guideline we recommend 10 to 12 treatments, taken at a rate of 2 a week to achieve best results. Maintenance treatments may follow once a month.
